

KUNCHAM ARJUN

Hyderabad, Telangana, India

+91 9398779819 | arjunkuncham05@gmail.com | linkedin.com/in/kuncham-arjun | github.com/kunchamarjun05

Education

Osmania University (Capital Degree College)

2023 - 2026

Bachelor of Computer Applications (BCA) | CGPA: 8.0 / 10

Hyderabad, India

Relevant Coursework

- Data Structures
- Database Management
- Web Technologies
- Statistics & Probability
- Algorithms
- Object-Oriented Programming
- Software Engineering
- Computer Networks

Projects

Healthcare AI Predictor | Python, Scikit-learn, Streamlit, XGBoost

May 2026

- Developed an AI-powered multi-disease prediction system for **Diabetes**, **Heart Disease**, and **Parkinson's Disease** using machine learning models.
- Implemented Random Forest and XGBoost classifiers achieving **85%+ accuracy** across all three disease prediction models.
- Built an interactive Streamlit UI with real-time predictions, data visualizations, and deployed on **Streamlit Cloud** for public access.

E-Commerce Analytics Dashboard | JavaScript, Python, SQL, Chart.js

April 2026

- Built an interactive analytics dashboard visualizing e-commerce KPIs including **revenue trends**, customer segments, and product performance metrics.
- Created Python scripts for synthetic data generation and implemented dynamic Chart.js visualizations with filtering capabilities.
- Deployed on **GitHub Pages** with responsive design for cross-device compatibility.

Credit Card Fraud Detection | Python, Scikit-learn, Pandas

March 2026

- Built a machine learning model using **Random Forest algorithm** to detect fraudulent credit card transactions with high precision-recall scores.
- Performed data preprocessing, feature engineering, and handled severe class imbalance using **SMOTE** oversampling technique.

SkyPulse Weather Application | JavaScript, REST API, CSS3

Feb 2026

- Developed a real-time weather application with dynamic backgrounds, city search, and geolocation using **OpenWeatherMap API**.
- Implemented responsive UI with CSS animations, glassmorphism effects, and **5-day forecast** visualization.

Employee Management System | JavaScript, HTML/CSS, SQL

Jan 2026

- Developed a full-stack CRUD web application for employee record management with **secure authentication**, search, filter, and sorting functionalities.
- Implemented a modern responsive dashboard interface with real-time data updates and form validation.

Technical Skills

Languages: Python, Java, C, JavaScript (ES6+), SQL, HTML5, CSS3

Developer Tools: VS Code, Jupyter Notebook, Git, GitHub, Streamlit, Google Analytics

Technologies/Frameworks: Scikit-learn, XGBoost, Pandas, NumPy, Matplotlib, Chart.js, REST APIs, Streamlit

Visualization & BI: Power BI, Tableau, Plotly, Seaborn, Excel

Certifications

GenAI Powered Data Analytics - Tata Group (via Forage)

Jan 2026

Data Science Job Simulation - Lloyds Banking Group (via Forage)

Jan 2026

Data Analytics Job Simulation - Deloitte Australia (via Forage)

Jan 2026

Google Analytics Certification - Google

Jan 2026

Data Labeling Job Simulation - Forage Academy

Jan 2026
