ABOUT ME

Potential Data Analyst who is well grounded in statistical analysis, data visualization and database management. Skilled in Excel, SQL, Python and Tableau. Driven by the desire to use data-driven insights to solve difficult problems and spur business discussion. Passionate about working in a dynamic growth focused company and willing to use my analytical abilities and data interest.

EDUCATION

Bachelor of Computer Applications
(BCA)

Capital Degree College I
Hyderabad, Telangana

2023 - 2026

Studied core subjects including Programming, Database Management Systems, Statistics, and Data Structures

Developed strong skills in Excel, SQL, Python, and data analysis concepts

Worked on academic and self-learning projects focused on data cleaning, analysis, and visualization

PROJECTS

Credit Card Fraud Detection using Random Forest and CART

Developed a machine learning model in python to detect fraudulent credit card transactions.

Implemented Random Forest and classifications and Regression Trees for classification.

Preprocessed and analyzed highly imbalanced transaction dataset using pandas and numpy.

Datasize : "analyzed 280,000+ transactions"

Result : "achieved 95% accuracy"

Vehicle Sales Dashboard

Built dynamic vehicle sales dashboard to track performance across regions, models, and time periods.

Analyzed sales trends and identified top-selling vehicles and revenue drivers.

Implemented filters (region, model, year) for interactive data exploration.
Improved business insights by presenting data through charts and KPIs.

CERTIFICATIONS & VIRTUAL EXPERIENCE

Deloitte - Data Analytics Job Simulation (Forage)

Google Analytics Certification

Lloyds Banking Group - Data Science Job Simulation (Forage)

SKILLS

- Programming Languages: Python
- Libraries: Pandas, NumPy, Scikit-learn
- Tools: Excel, Power BI, GitHub
- Machine Learning: Random Forest, CART, Classification, Model Evaluation
- Concepts: Data Cleaning, EDA, Feature Engineering, Data Visualization
